

## Thermal Energy Receives \$229,000 Purchase Order for Expansion of Gypsum Company's Heat Recovery System

**OTTAWA, ONTARIO – October 26, 2015** – Thermal Energy International Inc. (“Thermal Energy” or the “Company”) (TSXV: TMG), a global provider of proprietary energy efficiency solutions to the industrial, commercial and institutional sectors world-wide, today announced that it has received a purchase order valued at approximately \$229,000 for the expansion of the heat recovery system installed by the Company earlier this year. The Company announced the [initial order](#) for a trial-sized heat recovery system from this customer in January of this year. The order is expected to be fulfilled and revenue earned over the next six months.

“This follow-on order is a direct reflection of the benefits derived from the heat recovery system we installed earlier this year,” said William Crossland, CEO of Thermal Energy. “When we announced the initial order from this customer, we indicated that it was for a trial-sized system and that once the system demonstrated its effectiveness we believed the customer would move forward with an expanded system, which this current order represents. We remain focused on winning more business with multi-site customers, and this customer has numerous other sites around the world that could benefit from our proven energy efficiency solutions.”

The original heat recovery project together with this expansion project is expected to provide the customer with energy savings totalling approximately \$216,000 annually, resulting in an aggregate project payback of less than 2.5 years.

### **About Thermal Energy International Inc.**

Thermal Energy International Inc. is an established global supplier of proprietary, proven energy efficiency and emissions reduction solutions to the industrial and institutional sectors worldwide. We save our customers money and improve their bottom line by reducing their fuel use and cutting their carbon emissions. Our customers include a large number of Fortune 500 and other leading multinational companies across a wide range of industry sectors.

Thermal Energy is also a fully accredited professional engineering firm, and can offer advanced process and applications engineering services.

By providing a unique mix of proprietary products together with process, energy, environmental, and financial expertise Thermal Energy is able to deliver unique and significant financial and environmental benefits to our customers.

Thermal Energy's products include; [GEM™](#) - Steam traps, [FLU-ACE®](#) - Direct contact condensing heat recovery, and [Dry-Rex™](#) - Low temperature biomass drying systems.

Thermal Energy International Inc. has offices in Ottawa, Canada as well as Bristol, U.K., United States, Italy and China. The Company's common shares are traded on the TSX Venture Exchange (TSX-V) under the symbol TMG.

###

This press release contains forward-looking statements relating to, and amongst other things, based on management's expectations, estimates and projections, the anticipated effectiveness of the Company's products and services and the timing of revenues to be received by the Company. Statements relating to the expected installation and revenue recognition for projects, statements about the anticipated effectiveness and lifespan of the Company's products, statements about the expected environmental effects and cost savings associated with the Company's products and statements about the Company's backlog are forward looking statements. These statements are not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Many factors, some of which are outside of the Company's control, could cause events and results to differ materially from those stated. Fulfilment of orders, installation of product and activation of product could all be delayed for a number of reasons, some of which are outside of the Company's control, which would result in anticipated revenues from such projects being delayed or in the most serious cases eliminated. Actions taken by the Company's customers and factors inherent in the customer's facilities but not anticipated by the Company can have a negative impact on the expected effectiveness and lifespan of the Company's products and on the expected environmental effects and cost savings expected from the Company's products. Orders in the Company's backlog as described above may not turn into revenue due to many factors, some of which are outside of the Company's control, including but not limited to the Company's ability to deliver products on time and in accordance with specifications and the continuing financial viability of the customer. The Company disclaims any obligation to publicly update or revise any such statements except as required by law.

*Neither TSX Venture Exchange nor its Regulation Services Provider (as that term is defined in the policies of the TSX Venture Exchange) accepts responsibility for the adequacy or accuracy of this release.*
