

Quartz GEM™ Trap

GEM Steam Trap Technical Datasheet

ECU | Rev 8 | Jun 2021

The GEM Trap

The GEM Trap is a low maintenance steam trap with no moving parts; it will not wear and its performance is guaranteed* on saturated steam for 10 years. The unique orifice and multistaged throat technology utilizes the expansion of the flash steam created by the pressure differential across the trap to control the flow of condensate.

Operating over variable loads, the GEM Trap will suit all industrial applications. The single piece bodies are manufactured from wear and corrosion resistant grades of stainless steel.

The GEM Trap is the most energy efficient steam trap on the market and is supplied with a full sizing and commissioning service.

THE QUARTZ GEM TRAP

Quartz Traps contain GEM's inverted cone technology and an integral thimble filter to further protect the orifice from debris.
