

## Thermal Energy International Expands to New Larger Manufacturing, Distribution, and Administrative Centre in U.S.

---

OTTAWA, ONTARIO – April 7, 2021 – Thermal Energy International Inc. ("[Thermal Energy](#)" or the "Company") (TSX-V: [TMG](#)) an innovative cleantech company and global provider of energy efficiency and emissions reduction solutions to companies worldwide, together with its wholly owned subsidiary, [Boilerroom Equipment Inc.](#) ("BEI"), has expanded to a larger administrative, manufacturing, and distribution centre in Cheswick, PA.

Thermal Energy engineers, manufactures, and distributes products to customers all over the world from sites in Canada, the United States, and Europe. This new facility will add more strategic US capacity as well as global flexibility to the Company's existing robust in-house and outsourced manufacturing capabilities.

The new location features approximately 25,000 square feet of warehouse and manufacturing space, plus additional office space for a growing team of US-based engineers. With convenient access to the airport and major western Pennsylvania highways, and a location only ten miles northeast of downtown Pittsburgh, PA, the new site will enable improved product shipping efficiency and world-wide distribution.

"For the last eight years, BEI has manufactured the boiler industry's most advanced boiler economizers from a small site in Export, PA. Being limited to under 10,000 square feet at the old plant restrained our growth. Expanding to 25,000 square feet will allow us to not only facilitate BEI's own growth, but also serve a greater Thermal Energy, by enabling the potential for the vertical integration of [FLU-ACE](#)® assembly and [GEM](#)™ Steam Trap manufacturing, and distribution in North America," said [Vince Sands](#), BEI Founder & President.

"This signifies the next step of integration of BEI into Thermal Energy, and paves the way for increased fabrication volumes and more flexible stocking, as well as providing a US base capable of quickly adapting to continued Thermal Energy growth, with expedited service and delivery to the US market and beyond," said [William Crossland](#), CEO of Thermal Energy.

### **About Thermal Energy International Inc.**

Thermal Energy International Inc., ranked as one of [Canada's Top Growing Companies](#) in 2020 and 2019, is an established global supplier of proprietary, proven energy efficiency and emissions reduction solutions to the industrial and institutional sectors. We save our customers money and improve their bottom line by reducing their fuel use and cutting their carbon emissions. Our customers include many Fortune 500 and other leading multinational companies across a wide range of industry sectors.

Thermal Energy is a fully accredited professional engineering firm, and by providing a unique mix of proprietary products together with process, energy, and environmental engineering expertise, we can deliver unique turnkey projects with significant financial and environmental benefits for our customers.

Thermal Energy's proprietary products include: [GEM™](#) - Steam Traps, [FLU-ACE®](#) - Direct contact condensing heat recovery, [HEATSPONGE](#) – Indirect contact condensing heat recovery systems, and [DRY-REX™](#) - Low temperature biomass drying systems.

Thermal Energy has engineering offices in Ottawa, Canada, Pittsburgh, USA, as well as Bristol, UK, with sales offices in Canada, UK, USA, Germany, Poland, Italy, and China. TEI's common shares are traded on the TSX Venture Exchange (TSX-V) under the symbol TMG.
