

## **Thermal Energy Receives \$1,700,000 Heat Recovery Order from Leading Producer of Industrial and Fuel Alcohols**

**OTTAWA, ONTARIO – September 28, 2016** – [Thermal Energy International Inc.](#) (“Thermal Energy” or the “Company”) (TSXV: [TMG](#)), a global provider of proprietary energy efficiency solutions to the industrial, commercial and institutional sectors, has received a \$1.7 million order from a leading producer of industrial and fuel alcohols for the supply and installation of one of Thermal Energy’s proprietary FLU-ACE® heat recovery systems at one of the customer’s ethanol plants. The project is expected to be completed and revenue earned over the next six months.

“Our FLU-ACE heat recovery system will be used to heat a new greenhouse being built adjacent to one of the customer’s ethanol plants,” said William Crossland, CEO of Thermal Energy. “The amount of energy this FLU-ACE system is estimated to recover and deliver to the greenhouse would be enough to power approximately 1,300 average North American homes. Furthermore, using the waste heat from the ethanol plant, that otherwise would have been lost, to heat the greenhouse is an innovative win-win that provides the greenhouse with an economic and carbon neutral source of energy while providing the ethanol producer with an additional source of revenue.”

Thermal Energy’s FLU-ACE heat recovery technology has been implemented on dryer and boiler systems with great effectiveness in industrial facilities of many Fortune 500 and other leading multinational clients around the world. A series of related case studies and technical white papers demonstrating the energy efficiency and the environmental impact of the FLU-ACE technology are available on the Company’s website at [www.thermalenergy.com/flu-ace-heat-recovery](http://www.thermalenergy.com/flu-ace-heat-recovery).

### **About Thermal Energy International Inc.**

Thermal Energy International Inc. is an established global supplier of proprietary, proven energy efficiency and emissions reduction solutions to the industrial and institutional sectors worldwide. We save our customers money and improve their bottom line by reducing their fuel use and cutting their carbon emissions. Our customers include a large number of Fortune 500 and other leading multinational companies across a wide range of industry sectors.

Thermal Energy is also a fully accredited professional engineering firm, and can offer advanced process and applications engineering services.

By providing a unique mix of proprietary products together with process, energy, environmental, and financial expertise Thermal Energy is able to deliver unique and significant financial and environmental benefits to our customers.

Thermal Energy’s products include; [GEM](#)® - Steam traps, [FLU-ACE](#)® - Direct contact condensing heat recovery, and [Dry-Rex](#)® - Low temperature biomass drying systems.

Thermal Energy International Inc. has offices in Ottawa, Canada as well as Bristol, U.K., United States, Italy and China. The Company’s common shares are traded on the TSX Venture Exchange (TSX-V) under the symbol TMG.

###

This news release contains forward-looking statements relating to, and amongst other things, based on management's expectations, estimates and projections, the anticipated effectiveness of the Company's products and services and the timing of revenues to be received by the Company. Information as to the amount of heat recovered, energy savings and payback period associated with Thermal Energy International's products are based on the Company's own testing and average customer results to date. Statements relating to the expected installation and revenue recognition for projects, statements about the anticipated effectiveness and lifespan of the Company's products, statements about the expected environmental effects and cost savings associated with the Company's products and statements about the Company's ability to cross-sell its products and sell to more sites are forward looking statements. These statements are not guarantees of future performance and involve a number of risks, uncertainties and assumptions. Many factors, some of which are outside of the Company's control, could cause events and results to differ materially from those stated. Fulfilment of orders, installation of product and activation of product could all be delayed for a number of reasons, some of which are outside of the Company's control, which would result in anticipated revenues from such projects being delayed or in the most serious cases eliminated. Actions taken by the Company's customers and factors inherent in the customer's facilities but not anticipated by the Company can have a negative impact on the expected effectiveness and lifespan of the Company's products and on the expected environmental effects and cost savings expected from the Company's products. Any customer's willingness to purchase additional products from the Company is dependent on many factors, some of which are outside of the Company's control, including but not limited to the customer's perceived needs and the continuing financial viability of the customer. The Company disclaims any obligation to publicly update or revise any such statements except as required by law.
